

## **Net2 Essential Training**

### **Session Time - 9am- 1pm**

This session is crucial for anyone installing Net2, whether you are a new installer or a regular installer looking to keep up with the latest developments. This course will cover everything you need to know from;

- Components and architecture of a Net2 system
- Installation and configuration of networked and wireless control units
- Commissioning the system using Net2 software
- Using Net2 Entry with the access control systems
- Configuring users and their access control permissions
