Once downloaded open and install the program. It will ask for a username and password which are admin/letme1n by default.

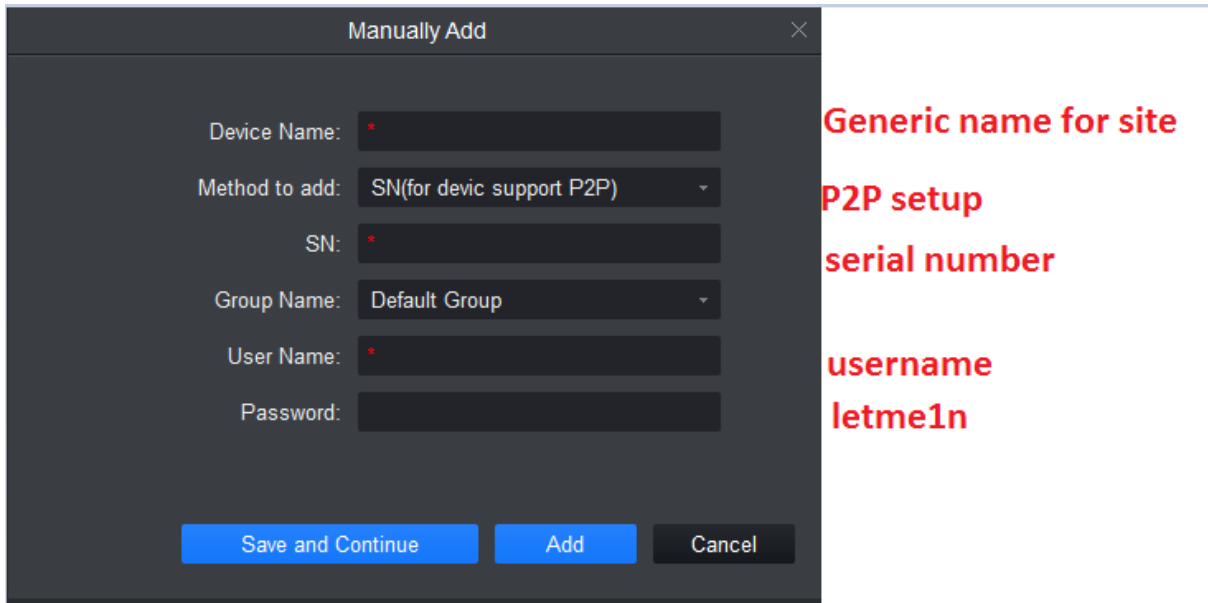

To add site on p2p simply select devices from home page;

Then select add at the top left of the next page

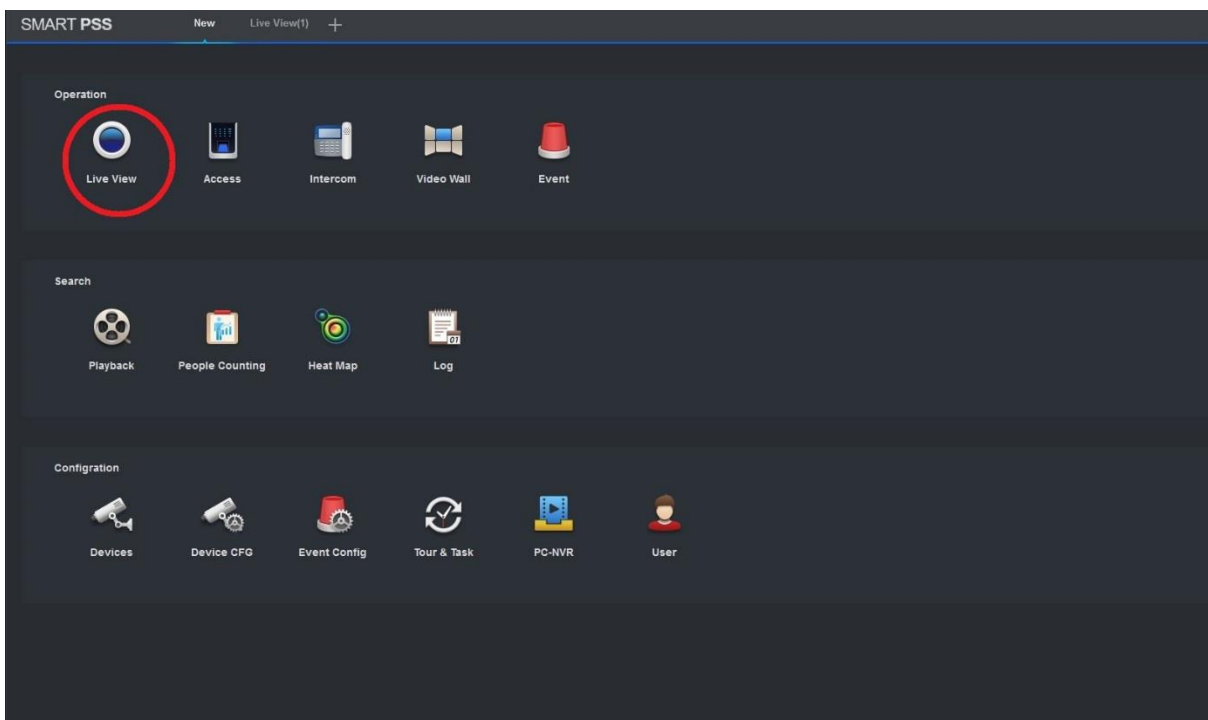

Then simply input customer site/name select P2P from drop down box in "Method to Add" Once you have selected your "Method to Add" just fill in the serial number of recorder for P2P or IP address/DDNS address. Then click "Get Info" for it to search for the device. The Device Details will fill in if successful, then click Save and continue.

The site will then add behind the information logging screen. Close the log in screen and you should see the site change from status red offline to green online.

Then click Home Page and go to Live view.

You should then see the site on the right hand side device list simply click and hold the site with your mouse and drag into the split screen and your cameras should come in.
